Unlock the Value of Your Data with Power BI Accelerator

Are you on a quest to get actionable business intelligence (BI) out of your data?

Today's businesses have more data than ever before. In fact, 90% of the world's data today has been created in the last two years alone. But these large data sets are notoriously difficult to capture, process, store, search, and analyze.

One of the problems is that the data lives in different systems. Sales data in one, accounts receivable data in another, and so on. Seeing the interdependencies of this siloed data using conventional systems like databases and spreadsheets is impossible. Another problem is the sheer volume of data. What data do you really need? What tools do you need to put in place to access it quickly?

Data intelligence is hard for everyone.

How can organizations explore the value of their data without incurring complex and often unsuccessful in-house development or assuming the risk and cost of a third-party solution?

We've come up with a better way.

Kick Start Business Intelligence with a Foundation for Success

Our Microsoft Power BI Accelerator Program gives your organization the opportunity to break into BI and kick start data-driven informed decision-making, without the need to invest in new systems, software, or expertise.

Microsoft Power BI Accelerator is a one-of-a-kind pilot program developed by EastBanc Technologies and made available for a limited time.

Delivered over a duration of 3-4 weeks, we'll partner with you to understand your most pressing BI requirements, transform your data, and deliver the analytics and reports you need to reveal previously unexplored insights.

The program combines Microsoft's Power BI cloud technology with our proven data integration, transformation, and BI expertise (not forgetting our Microsoft Gold Partner status). Simply tell us what data you have, what you want to achieve with it, and we'll do the rest.

Business Intelligence
investments.***

Solution Overview

The Power BI Accelerator Program eliminates much of the cost and risk inherent in exploring new BI opportunities without the need for software investment or a long-term commitment.

We've scoped the program specifically to meet your needs:

- 1. Kick-off**— It all starts with a kick-off meeting where we'll uncover your BI goals.
- 2. Crafting a strategy**—Next we'll tailor the program to your specific needs. During the requirement gathering phase we'll define the project scope, goals, and deliverables. Your data sources will be identified along with ways we can connect and leverage them. Most importantly, we'll pinpoint your immediate reporting needs.
- 3. Unite your data**—We'll connect, expose, convert, and clean your data so that we can help you begin analyzing it effectively.
- 4. Report creation**—Clear, self-explanatory reports that unlock the value of your business data are delivered iteratively and collaboratively.
- 5. Delivery**—The program is fully inclusive of up to eight reports. We'll also show you how easy it is for employees to generate their own reports, without the need for IT intervention – something that traditional tools can't guarantee.

Worry-free, self-service BI has never been this easy.

Extend the Use of your Data, Beyond Reporting

It doesn't stop there. Our approach is uniquely different in that we don't just focus on outcomes. Our methodology ensures that your organization can continue to leverage its newly united data across other integration projects, beyond your initial reporting needs.

We do this by creating a data architecture that ensures that the data extracted from your heterogeneous data sources, transformed into the proper format for analysis, and loaded into a single data store for processing, is maintainable and easily accessible to other applications, if required in the future.

Break Into Data Intelligence and Save

Contact us today to learn more about how your organization can participate in the Power BI Accelerator Program and see how affordable and accessible business intelligence can be.

EASTBANC
TECHNOLOGIES
COMPLEXITY MADE SIMPLE

EastBanc Technologies has been working at the frontier of technology since 1999. Today, the firm provides full-lifecycle software development delivering flexible technology solutions that seamlessly integrate with existing systems—whether on premise or cloud. EastBanc Technologies partners with public and private sector clients to solve their most difficult technology challenges. Headquartered in Washington DC, the firm employs 200 people.
